

# Better, Faster, Smarter.

With version 33, we've redefined routing. Routing is no longer just an origin and a destination with a mileage total — it's a drive time calculation, an ETA prediction, and precise last mile directions, all taking into account Hours of Service and real-time roadway conditions. We've got the tools to help any fleet make routing better, faster, and smarter.

**Improved ETA calculations and drive times** by taking into account factors such as truck speed limits by jurisdiction and average speeds on lower class local roads\*

**Precise last mile routing** to over 9,400 locations, including Truck Stops and Distribution Centers, that have been pre-defined with truck entry and exit gates

**In app messages** for maintenance releases, map updates, and other important software notifications

## Accurate Last Mile Routing to the Right Gate

- ▶ After an address is entered as a stop, PC\*MILER will recognize as if the address is part of a pre-defined Site, and route to the appropriate truck entry gate\*

## Smart Route Planning with Hours of Service

- ▶ Generate realistic ETAs incorporating Hours of Service stop durations
- ▶ Appropriately plan Hours of Service breaks at preferred stop locations along a route
- ▶ View fuel pricing and other amenity information at stop locations along the route

\*Additional licensing may apply

## Which PC\*MILER is right for you?

### Network Desktop Install

Robust back office software for mileage, routing, accounting, and operations.

*Ideal for larger fleets who require local or network installation*

### Basic Web-Based Version

Routing and reporting starting as low as \$39.95/month per user.

*Ideal for small fleets, owner/operators, and brokers*

### Integration APIs

Integrate features and data within third party applications.

*Ideal for solution providers for fleets with custom desktop or web-based solutions*

### Through a TMS or ERP

We partner with the leading system providers to get PC\*MILER features and data to customers.
